8. Data protection provisions about the application and use of Facebook.

On our Website, the controller has integrated components of the enterprise Facebook. Facebook is a social network.

A social network is a place for social meetings on the Internet, an online community, which usually allows users to communicate with each other and interact in a virtual space. A social network may serve as a platform for the exchange of opinions and experiences, or enable the Internet community to provide personal or business-related information. Facebook allows social network users to include the creation of private profiles, upload photos, and network through friend requests.
The operating company of Facebook is Facebook, Inc., 1 Hacker Way, Menlo Park, CA 94025, United States. If a person lives outside of the United States or Canada, the controller is the Facebook Ireland Ltd., 4 Grand Canal Square, Grand Canal Harbour, Dublin 2, Ireland.

With each call-up to one of the individual pages of this Internet website, which is operated by the controller and into which a Facebook component (Facebook plug-ins) was integrated, the web browser on the information technology system of the data subject is automatically prompted to download display of the corresponding Facebook component from Facebook through the Facebook component. An overview of all the Facebook Plug-ins may be accessed under https://developers.facebook.com/docs/plugins/. During the course of this technical procedure, Facebook is made aware of what specific sub-site of our website was visited by the data subject.

If the data subject is logged in at the same time on Facebook, Facebook detects with every call-up to our website by the data subject - and for the entire duration of their stay on our Internet site - which specific sub-site of our Internet page was visited by the data subject. This information is collected through the Facebook component and associated with the respective Facebook account of the data subject. If the data subject clicks on one of the Facebook buttons integrated into our website, e.g. the "Like" button, or if the data subject submits a comment, then Facebook matches this information with the personal Facebook user account of the data subject and stores the personal data.

Facebook always receives, through the Facebook component, information about a visit to our website by the data subject, whenever the data subject is logged in at the same time on Facebook during the time of the call-up to our website. This occurs regardless of whether the data subject clicks on the Facebook component or not. If such a transmission of information to Facebook is not desirable for the data subject, then he or she may prevent this by logging off from their Facebook account before a call-up to our website is made.

The data protection guideline published by Facebook, which is available at https://facebook.com/about/privacy/, provides information about the collection, processing and use of personal data by Facebook. In addition, it is explained there what setting options Facebook offers to protect the privacy of the data subject. In addition, different configuration options are made available to allow the elimination of data transmission to Facebook. These applications may be used by the data subject to eliminate a data transmission to Facebook.

9. Data protection provisions about the application and use of Google AdSense.

On our Website, the controller has integrated Google AdSense. Google AdSense is an online service which allows the placement of advertising on third-party sites. Google AdSense is based on an algorithm that selects advertisements displayed on third-party sites to match with the content of the respective third-party site. Google AdSense allows an interest-based targeting of the Internet user, which is implemented by means of generating individual user profiles.
The operating company of Google’s AdSense component is Alphabet Inc., 1600 Amphitheatre Pkwy, Mountain View, CA 94043-1351, United States.

The purpose of Google's AdSense component is the integration of advertisements on our website. Google AdSense places a cookie on the information technology system of the data subject. The definition of cookies is explained above. With the setting of the cookie, Alphabet Inc. is enabled to analyze the use of our website. With each call-up to one of the individual pages of this Internet site, which is operated by the controller and into which a Google AdSense component is integrated, the Internet browser on the information technology system of the data subject will automatically submit data through the Google AdSense component for the purpose of online advertising and the settlement of commissions to Alphabet Inc. During the course of this technical procedure, the enterprise Alphabet Inc. gains knowledge of personal data, such as the IP address of the data subject, which serves Alphabet Inc., inter alia, to understand the origin of visitors and clicks and subsequently create commission settlements.

The data subject may, as stated above, prevent the setting of cookies through our website at any time by means of a corresponding adjustment of the web browser used and thus permanently deny the setting of cookies. Such an adjustment to the Internet browser used would also prevent Alphabet Inc. from setting a cookie on the information technology system of the data subject. Additionally, cookies already in use by Alphabet Inc. may be deleted at any time via a web browser or other software programs.

Furthermore, Google AdSense also uses so-called tracking pixels. A tracking pixel is a miniature graphic that is embedded in web pages to enable a log file recording and a log file analysis through which a statistical analysis may be performed. Based on the embedded tracking pixels, Alphabet Inc. is able to determine if and when a website was opened by a data subject, and which links were clicked on by the data subject. Tracking pixels serve, inter alia, to analyze the flow of visitors on a website.

Through Google AdSense, personal data and information - which also includes the IP address, and is necessary for the collection and accounting of the displayed advertisements - is transmitted to Alphabet Inc. in the United States of America. These personal data will be stored and processed in the United States of America. The Alphabet Inc. may disclose the collected personal data through this technical procedure to third parties.

Google AdSense is further explained under the following link https://www.google.com/intl/en/adsense/start/.

10. Data protection provisions about the application and use of Google Analytics (with anonymization function).

On this website, the controller has integrated the component of Google Analytics (with the anonymizer function). Google Analytics is a web analytics service. Web analytics is the collection,
gathering, and analysis of data about the behavior of visitors to websites. A web analysis service collects, inter alia, data about the website from which a person has come (the so-called referrer), which sub-pages were visited, or how often and for what duration a sub-page was viewed. Web analytics are mainly used for the optimization of a website and in order to carry out a cost-benefit analysis of Internet advertising.

The operator of the Google Analytics component is Google Inc., 1600 Amphitheatre Pkwy, Mountain View, CA 94043-1351, United States.

For the web analytics through Google Analytics the controller uses the application "_gat._anonymizelp". By means of this application the IP address of the Internet connection of the data subject is abridged by Google and anonymized when accessing our websites from a Member State of the European Union or another Contracting State to the Agreement on the European Economic Area.

The purpose of the Google Analytics component is to analyze the traffic on our website. Google uses the collected data and information, inter alia, to evaluate the use of our website and to provide online reports, which show the activities on our websites, and to provide other services concerning the use of our Internet site for us.

Google Analytics places a cookie on the information technology system of the data subject. The definition of cookies is explained above. With the setting of the cookie, Google is enabled to analyze the use of our website. With each call-up to one of the individual pages of this Internet site, which is operated by the controller and into which a Google Analytics component was integrated, the Internet browser on the information technology system of the data subject will automatically submit data through the Google Analytics component for the purpose of online advertising and the settlement of commissions to Google. During the course of this technical procedure, the enterprise Google gains knowledge of personal information, such as the IP address of the data subject, which serves Google, inter alia, to understand the origin of visitors and clicks, and subsequently create commission settlements.

The cookie is used to store personal information, such as the access time, the location from which the access was made, and the frequency of visits of our website by the data subject. With each visit to our Internet site, such personal data, including the IP address of the Internet access used by the data subject, will be transmitted to Google in the United States of America. These personal data are stored by Google in the United States of America. Google may pass these personal data collected through the technical procedure to third parties.

The data subject may, as stated above, prevent the setting of cookies through our website at any time by means of a corresponding adjustment of the web browser used and thus permanently deny the setting of cookies. Such an adjustment to the Internet browser used would also prevent Google Analytics from setting a cookie on the information technology system of the data subject. In addition, cookies already in use by Google Analytics may be deleted at any time via a web browser or other software programs.

In addition, the data subject has the possibility of objecting to a collection of data that are generated by Google Analytics, which is related to the use of this website, as well as the processing of this data by Google and the chance to preclude any such. For this purpose, the data subject must download a browser add-on under the link https://tools.google.com/dlpage/
gaoptout and install it. This browser add-on tells Google Analytics through a JavaScript, that any data and information about the visits of Internet pages may not be transmitted to Google Analytics. The installation of the browser add-ons is considered an objection by Google. If the information technology system of the data subject is later deleted, formatted, or newly installed, then the data subject must reinstall the browser add-ons to disable Google Analytics. If the browser add-on was uninstalled by the data subject or any other person who is attributable to their sphere of competence, or is disabled, it is possible to execute the reinstallation or reactivation of the browser add-ons.

Further information and the applicable data protection provisions of Google may be retrieved under https://www.google.com/intl/en/policies/privacy/. Google Analytics is further explained under the following Link https://www.google.com/analytics/.

11. Data protection provisions about the application and use of Google Remarketing.

On this website, the controller has integrated Google Remarketing services. Google Remarketing is a feature of Google AdWords, which allows an enterprise to display advertising to Internet users who have previously resided on the enterprise’s Internet site. The integration of Google Remarketing therefore allows an enterprise to create user-based advertising and thus shows relevant advertisements to interested Internet users.

The operating company of the Google Remarketing services is the Google Inc., 1600 Amphitheatre Pkwy, Mountain View, CA 94043-1351, United States.

The purpose of Google Remarketing is the insertion of interest-relevant advertising. Google Remarketing allows us to display ads on the Google network or on other websites, which are based on individual needs and matched to the interests of Internet users.

Google Remarketing sets a cookie on the information technology system of the data subject. The definition of cookies is explained above. With the setting of the cookie, Google enables a recognition of the visitor of our website if he calls up consecutive web pages, which are also a member of the Google advertising network. With each call-up to an Internet site on which the service has been integrated by Google Remarketing, the web browser of the data subject identifies automatically with Google. During the course of this technical procedure, Google receives personal information, such as the IP address or the surfing behavior of the user, which Google uses, inter alia, for the insertion of interest relevant advertising.

The cookie is used to store personal information, e.g. the Internet pages visited by the data subject. Each time we visit our Internet pages, personal data, including the IP address of the Internet access used by the data subject, is transmitted to Google in the United States of America. These personal data are stored by Google in the United States of America. Google may pass these personal data collected through the technical procedure to third parties.
The data subject may, as stated above, prevent the setting of cookies through our website at any time by means of a corresponding adjustment of the web browser used and thus permanently deny the setting of cookies. Such an adjustment to the Internet browser used would also prevent Google from setting a cookie on the information technology system of the data subject. In addition, cookies already in use by Google may be deleted at any time via a web browser or other software programs.

In addition, the data subject has the possibility of objecting to the interest-based advertising by Google. For this purpose, the data subject must call up the link to www.google.de/settings/ads and make the desired settings on each Internet browser used by the data subject.

Further information and the actual data protection provisions of Google may be retrieved under https://www.google.com/intl/en/policies/privacy/.

12. Data protection provisions about the application and use of Google+.

On this website, the controller has integrated the Google+ button as a component. Google+ is a so-called social network. A social network is a social meeting place on the Internet, an online community, which usually allows users to communicate with each other and interact in a virtual space. A social network may serve as a platform for the exchange of opinions and experiences, or enable the Internet community to provide personal or business-related information. Google+ allows users of the social network to include the creation of private profiles, upload photos and network through friend requests.

The operating company of Google+ is Google Inc., 1600 Amphitheatre Pkwy, Mountain View, CA 94043-1351, the UNITED STATES.

With each call-up to one of the individual pages of this website, which is operated by the controller and on which a Google+ button has been integrated, the Internet browser on the information technology system of the data subject automatically downloads a display of the corresponding Google+ button of Google through the respective Google+ button component. During the course of this technical procedure, Google is made aware of what specific sub-page of our website was visited by the data subject. More detailed information about Google+ is available under https://developers.google.com/.

If the data subject is logged in at the same time to Google+, Google recognizes with each call-up to our website by the data subject and for the entire duration of his or her stay on our Internet site, which specific sub-pages of our Internet page were visited by the data subject. This information is collected through the Google+ button and Google matches this with the respective Google+ account associated with the data subject.

If the data subject clicks on the Google+ button integrated on our website and thus gives a Google+ 1 recommendation, then Google assigns this information to the personal Google+ user
account of the data subject and stores the personal data. Google stores the Google+ recommendation of the data subject, making it publicly available in accordance with the terms and conditions accepted by the data subject in this regard. Subsequently, a Google+ recommendation given by the data subject on this website together with other personal data, such as the Google+ account name used by the data subject and the stored photo, is stored and processed on other Google services, such as search-engine results of the Google search engine, the Google account of the data subject or in other places, e.g. on Internet pages, or in relation to advertisements. Google is also able to link the visit to this website with other personal data stored on Google. Google further records this personal information with the purpose of improving or optimizing the various Google services.

Through the Google+ button, Google receives information that the data subject visited our website, if the data subject at the time of the call-up to our website is logged in to Google+. This occurs regardless of whether the data subject clicks or does not click on the Google+ button.

If the data subject does not wish to transmit personal data to Google, he or she may prevent such transmission by logging out of his Google+ account before calling up our website.

Further information and the data protection provisions of Google may be retrieved under https://www.google.com/intl/en/policies/privacy/. More references from Google about the Google+ button may be obtained under https://developers.google.com/

13. Data protection provisions about the application and use of Google-AdWords.

On this website, the controller has integrated Google AdWords. Google AdWords is a service for Internet advertising that allows the advertiser to place ads in Google search engine results and the Google advertising network. Google AdWords allows an advertiser to pre-define specific keywords with the help of which an ad on Google’s search results only then displayed, when the user utilizes the search engine to retrieve a keyword-relevant search result. In the Google Advertising Network, the ads are distributed on relevant web pages using an automatic algorithm, taking into account the previously defined keywords.

The operating company of Google AdWords is Google Inc., 1600 Amphitheatre Pkwy, Mountain View, CA 94043-1351, the UNITED STATES.

The purpose of Google AdWords is the promotion of our website by the inclusion of relevant advertising on the websites of third parties and in the search engine results of the search engine Google and an insertion of third-party advertising on our website.

If a data subject reaches our website via a Google ad, a conversion cookie is filed on the information technology system of the data subject through Google. The definition of cookies is explained above. A conversion cookie loses its validity after 30 days and is not used to identify
the data subject. If the cookie has not expired, the conversion cookie is used to check whether certain sub-pages, e.g., the shopping cart from an online shop system, were called up on our website. Through the conversion cookie, both Google and the controller can understand whether a person who reached an AdWords ad on our website generated sales, that is, executed or canceled a sale of goods.

The data and information collected through the use of the conversion cookie is used by Google to create visit statistics for our website. These visit statistics are used in order to determine the total number of users who have been served through AdWords ads to ascertain the success or failure of each AdWords ad and to optimize our AdWords ads in the future. Neither our company nor other Google AdWords advertisers receive information from Google that could identify the data subject.

The conversion cookie stores personal information, e.g. the Internet pages visited by the data subject. Each time we visit our Internet pages, personal data, including the IP address of the Internet access used by the data subject, is transmitted to Google in the United States of America. These personal data are stored by Google in the United States of America. Google may pass these personal data collected through the technical procedure to third parties.

The data subject may, at any time, prevent the setting of cookies by our website, as stated above, by means of a corresponding setting of the Internet browser used and thus permanently deny the setting of cookies. Such a setting of the Internet browser used would also prevent Google from placing a conversion cookie on the information technology system of the data subject. In addition, a cookie set by Google AdWords may be deleted at any time via the Internet browser or other software programs.

The data subject has a possibility of objecting to the interest based advertisement of Google. Therefore, the data subject must access from each of the browsers in use the link www.google.de/settings/ads and set the desired settings.

Further information and the applicable data protection provisions of Google may be retrieved under https://www.google.com/intl/en/policies/privacy/.

14. Data protection provisions about the application and use of Twitter.

On this website, the controller has integrated components of Twitter. Twitter is a multilingual, publicly-accessible microblogging service on which users may publish and spread so-called ‘tweets,’ e.g. short messages, which are limited to 280 characters. These short messages are available for everyone, including those who are not logged on to Twitter. The tweets are also displayed to so-called followers of the respective user. Followers are other Twitter users who follow a user’s tweets. Furthermore, Twitter allows You to address a wide audience via hashtags, links or retweets.

The operating company of Twitter is Twitter, Inc., 1355 Market Street, Suite 900, San Francisco, CA 94103, UNITED STATES.
With each call-up to one of the individual pages of this Internet site, which is operated by the controller and on which a Twitter component (Twitter button) was integrated, the Internet browser on the information technology system of the data subject is automatically prompted to download a display of the corresponding Twitter component of Twitter. Further information about the Twitter buttons is available under https://about.twitter.com/de/resources/buttons. During the course of this technical procedure, Twitter gains knowledge of what specific sub-page of our website was visited by the data subject. The purpose of the integration of the Twitter component is a retransmission of the contents of this website to allow our users to introduce this web page to the digital world and increase our visitor numbers.

If the data subject is logged in at the same time on Twitter, Twitter detects with every call-up to our website by the data subject and for the entire duration of their stay on our Internet site which specific sub-page of our Internet page was visited by the data subject. This information is collected through the Twitter component and associated with the respective Twitter account of the data subject. If the data subject clicks on one of the Twitter buttons integrated on our website, then Twitter assigns this information to the personal Twitter user account of the data subject and stores the personal data.

Twitter receives information via the Twitter component that the data subject has visited our website, provided that the data subject is logged in on Twitter at the time of the call-up to our website. This occurs regardless of whether the person clicks on the Twitter component or not. If such a transmission of information to Twitter is not desirable for the data subject, then he or she may prevent this by logging off from their Twitter account before a call-up to our website is made.

The applicable data protection provisions of Twitter may be accessed under https://twitter.com/privacy?lang=en.
